The Honorable Thomas H. Kean
Governor of the State of New Jersey

Honorable Members of the Senate and
Assembly of the State of New Jersey

Dear Governor and Members of the Legislature:

Pursuant to N.J.S.A. 52:17B-5.5, I am submitting the twentieth annual report of crime in New Jersey. This information is based on crime statistics submitted to the New Jersey Uniform Crime Reporting System by every New Jersey law enforcement agency for the year 1986.

Also included in this publication are 1985 and 1986 statistics collected in conformance with the Prevention of Domestic Violence Act. Gathering the particulars of the domestic violence incident is a necessary step toward combating this serious crime against society.

Effective law enforcement requires accurate crime statistics in order to identify the extent, type and location of criminal activity. Criminal Justice administrators and planners have long recognized the Uniform Crime Reporting Program as the vehicle to accomplish this objective.

The success of the Uniform Crime Reporting System during 1986 could not have been realized without the cooperation extended by each of the 572 law enforcement agencies of the state, the New Jersey Chiefs of Police Association and the County Prosecutors Association.

It is in the interest of more effective law enforcement to over 7 million residents of New Jersey that the twentieth annual report is submitted.

Respectfully,

W. Cary Edwards

W. Cary Edwards

SYNOPSIS
UNIFORM CRIME
REPORTING PROGRAM

THE NEW JERSEY UNIFORM CRIME REPORTING SYSTEM

DEFINITION

The New Jersey Uniform Crime Reporting System is based upon the compilation, classification, and analysis of crime data reported by all New Jersey police agencies in accordance with the regulations prescribed by law.

DEVELOPMENT

The New Jersey Uniform Crime Reporting Law (N.J.S.A. 52:17 B-5.1 et seq) was enacted on May 16, 1966, and became effective January 1, 1967. Responsibility for the establishment, direction, control, and supervision of the Uniform Crime Reporting System was assigned to the State's Attorney General. The Attorney General authorized the New Jersey State Police to collect and collate the crime data received from law enforcement agencies within the state.

At the request of the Attorney General, the New Jersey State Police researched crime systems in operation throughout the nation in order to establish a firm foundation from which to grow. The most logical approach was the paralleling of the federal crime reporting system. There was a distinct need for a compatibility feature that would enhance both the state and federal systems through the data entry at both levels.

This compatibility has, as its nucleus, the standard classification of offenses established by the Federal Bureau of Investigation. Regardless of the label placed on a particular offense in the various states' systems, i.e., felony, misdemeanor, disorderly persons, if the incident meets the federal standard it will be reported as an offense.

The terms "crime" and "offense" are used interchangeably in this publication, and refer to an act committed in violation of a law which is reportable under the guidelines of the Uniform Crime Reporting Program.

The Committee on Uniform Crime Reporting of the New Jersey State Chiefs of Police Association has served the program in an advisory capacity since 1966. The contributions of this committee have proven valuable to the success of the program. This committee works in close harmony with the State Police as a means of improving the quality of reporting through recommended program standards, policies, and procedures.

COLLECTION OF CRIME DATA

As required by statute, all law enforcement agencies in the state submit monthly and annual summary crime reports to the program. During the year 1986, offense and arrest data were received from 484 full-time municipal police departments. Fifteen (15) part-time municipal police departments, and the New Jersey State Police (acting as the reporting agent for the 60 municipalities without local police services). In addition to the 484 full-time municipal police departments there are eight police departments contracted by other municipalities.

In addition to the above agencies, arrest data were received from the state's twenty-one (21) prosecutors, sheriffs' departments, four (4) county police departments, and four (4) county park police departments. In order to incorporate all New Jersey law enforcement agencies under the system, the ten (10) other state agencies with law enforcement responsibilities, as well as thirteen (13) college campus police departments were incorporated within the program. Collectively, a total of 572 law enforcement agencies submit their reports to the New Jersey State Police.

METHOD

A State of New Jersey Uniform Crime Reporting Guide, has been distributed to all contributors. It outlines reporting procedures in detail, and is complete to the extent of providing examples and illustrations. Field representatives provide additional instruction and clarification when required.

All reported offenses are related to the municipality in which they occur rather than to the agency which may conduct the investigation. The clearance is credited to the municipality in which the offense occurred. Each contributing agency is responsible for compiling its own reports. Law enforcement agencies report the number of known offenses according to the following categories: Homicide (Murder and Manslaughter), Rape, Robbery, Burglary, Larceny-theft, Motor Vehicle Theft, and Arson. The "Crime in New Jersey," and the Federal Bureau of Investigation's "Crime in the United States" publications, exclude manslaughters, simple assaults, and arsons from the "Index" offenses. These are further referred to as "violent" and "nonviolent" crimes as graphically illustrated in Section VII under "Municipal and County Offense and Demographic Data," and Section II, "State Summary and Offense Analysis."

All reported offenses are compiled from a record of all criminal complaints received by police from victims or other sources, or discovered by the police during routine operations. Complaints determined to be unfounded are eliminated from this count. Analytical data pertaining to specific crime categories are also reported, i.e., total adult and juvenile arrests made during the month. Police killed or assaulted, and arson data are also collected monthly. Police personnel information is submitted on an annual basis.

VERIFICATION PROCESSES

The uniformity and accuracy of data gathered from 572 contributors must be safeguarded through various ways. Although guidelines and instructions are provided each contributor, they are not the panacea for the accuracy being sought.

The reports received by the Uniform Crime Reporting Unit are recorded and examined for mathematical accuracy and reasonableness of the interpretation of the offense classifications. Improper classifications, changes in reporting procedures, or actual change are identified in this manner. Errors of a minor nature are corrected by direct telephone contact with the contributors, while all other errors are resolved through a personal visit by a field representative to the reporting agency.

Further verification is accomplished through the analysis of statistical data accrued from the reports submitted. Fluctuations in crime rates noted from previous submissions are verified by the field representatives through their municipal counterpart.

FUNCTION

Police executives make use of this data in administrative, planning, and operational determinations for their respective jurisdictions. The State Police Uniform Crime Reporting Unit provides assistance to municipal police agencies through the individual analysis of statistics as they relate to specific crime problems within their jurisdiction. Police executives also use this data for identifying manpower and equipment needs. The Uniform Crime Reporting Program requirements not only have increased police efficiency in reporting and recordkeeping areas, but have helped police in their day to day operations.

Although the data collected on the offenses of manslaughter and simple assault are not presented in the annual report, they are required for the federal system. However, this data is processed and available for special research purposes.

PROFILE OF NEW JERSEY

New Jersey is situated between the major industrial markets of New York and Philadelphia and can be classified as the "Crossroads of the East." The geographic location of the state has been a major factor in its growth and development. The many miles of super-expressway facilities within the state connect New Jersey directly with the neighboring states of New York, Pennsylvania, and Delaware. Additionally, New Jersey as a corridor state, accommodates large volumes of traffic from both the eastern and western part of the United States.

The state is politically comprised of 21 counties which contain 567 incorporated municipalities. Nationally, New Jersey, although 46th in size, ranks ninth in population and first as the most densely populated state in the country. In addition to this density of 1,008.9 persons per square mile, New Jersey still has many miles of rural areas and sparsely settled communities. The areas of density show a heavy concentration around the major urban centers and those areas most accessible for commuting.

1985 Area In Sq. Miles	1980 Census Population	1985 Provisional Population	1985/1980 Percent Change	1980 Density Per Sq. Mile	1985 Density Per Sq. Mile
7,495.73	7,365,011	7,562,482	+3%	982.6	1,008.9

STATE, COUNTY AND MUNICIPAL PROFILES

The presentation of state, county and municipal profiles in this section is offered for the purpose of projecting, for the consideration of the reader, a group of recognizable factors which may affect the amount and type of crime that occurs from community to community. Selection of the areas of information to be related to individual municipalities was based on the immediacy and completeness of data available.

Population statistics presented here, and throughout this publication, were obtained from the Department of Labor, Division of Planning and Research, Office of Demographic and Economic Analysis. The adjusted 1985 census counts of population were used in this publication.

Character of municipalities by urban, suburban and rural classifications, and square miles, were compiled by the Department of Community Affairs, Division of State and Regional Planning, Bureau of Statewide Planning. Following is a list of categories used and a description of each category.

• URBAN CENTER	Densely populated with extensive development.
• URBAN-SUBURBAN	Near an urban center but not as extremely developed and more residential areas.
• SUBURBAN	Predominantly single family residential, within a short distance of an urban area.
• RURAL	Scattered small communities and isolated single family dwellings.
• RURAL CENTER	High density core area with surrounding municipalities rural.

Certain other socio-economic factors present in varying degrees in all communities may have an influence on resulting crime rates. Obvious difficulties in the identification, documentation and measurement of these factors, however, precluded their application in this report.

Those factors presented were listed to affirm their existence within the county and community and to provide a base for consideration in the evaluation of that community's crime experience.

CRIME FACTORS

In order to provide a meaningful statistical profile of crime within the State of New Jersey, each law enforcement agency must provide the Uniform Crime Reporting Unit with data that depicts specific crimes that are occurring within their jurisdiction. There is a need for compatibility with the National Uniform Crime Reporting System and, therefore, categories of offense classifications used within the state are identical with those of the National System. This results in equitable conclusions being drawn from the data submitted.

Reported Part I offenses and arrests are recorded in the municipality where they occurred, regardless of the outside investigative agency which may investigate, arrest, or otherwise dispose of the case.

The factors which influence crime rates are dependent upon characteristics of the community. When attempting to interpret the crime statistics presented herein, one should be aware of the social structure and factors that lead to or cause criminal behavior.

Crime rates in this publication are based on the stable population of the municipality. Fluctuating seasonal population figures are too inaccurate to be used as a measurement for determining crime rates. Municipalities with high seasonal populations may indicate a higher crime rate per one thousand than may be normal for a municipality their size. This would also be indicated in municipalities that experience high population increases due to special events or commuters.

Set forth below are some of the factors which, by type and volume, will affect the crime that occurs from place to place:

- Density and size of the community population and the metropolitan areas of which it is a part.
- Composition of the population with reference particularly to age, sex, and race.
- Economic status, including job availability, and mores of the population.
- Relative stability of population, including commuter, seasonal, and other transient types.
- Climate, including seasonal weather conditions.
- Cultural conditions, such as educational, recreational, and religious characteristics.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphases of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Crime reporting practices of the general citizenry.
- Attitudes of the public toward crime reporting.
- The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.
- Cooperation of adjoining and overlapping police agencies.

THE POLICE POINT OF VIEW

The New Jersey State Police Uniform Crime Reporting Unit surveyed various police agencies of the state, attempting to ascertain their opinion concerning factors contributing to the increase or decrease of specific crimes in their municipality. One of the goals of the Uniform Crime Reporting Unit is to assist police in reducing crime by first identifying its extent, type and location. The following viewpoints are offered with the expectation of reaching this goal.

ROBBERY

Decreases:

- More stringent sentencing requirements under the State Criminal Code.
- Increased communications technology has led to better communication and increased exchanges of information between police departments.
- Highly visible foot patrols being deployed in commercial areas and densely populated residential areas.
- Use of Anti-crime Units in high robbery areas.

Increases:

- Resort areas have shown an increasing seasonal population.
- Our highly mobile society provides easy access to areas which were previously difficult to reach.

BURGLARY

Decreases:

- Better deployment of police manpower, such as highly visible foot patrols in high density crime areas, and increased patrols during probable times and at probable locations of burglaries.
- More stringent sentencing requirements under the State's Criminal Code has been a deterrent.
- Crime Prevention Programs are being stressed in many communities and citizens have been taking a more active part by reporting suspicious persons or circumstances.

Increases:

- Extreme increases in population in certain areas have led to new housing in suburban and rural areas.
- Husband and wife are both working; leaving homes frequently unoccupied for long periods of time.

LARCENY

Decreases:

- Public awareness programs contribute to the decrease in thefts from parked vehicles.
- Improved or additional lighting deter criminal acts from occurring in parking areas.
- "Safe Streets" Programs and Anti-crime Units have been established in many municipalities.

Increases:

- Shoplifting is a theft that police have little or no control over. Store security forces are under the control of the store administration, and their policies vary from strict enforcement, arrest and prosecution, to only a warning. Policy change has been directed toward prosecuting the offenders rather than warning them, causing to some extent an increase in the number of shoplifting offenses reported to police.
- Certain types of property such as tape decks, radar detectors and radios are popular and present resale opportunities.
- Youth gang activity on the increase resulting in thefts from motor vehicle.

MOTOR VEHICLE THEFT

Decreases:

- Stronger sentencing of career criminals has been effective.
- Modern ignition systems and anti-theft devices act as a deterrent.
- Better lighting in parking lots has helped decrease motor vehicle thefts.

Increases:

- The tremendous replacement cost of auto parts has contributed significantly to the increase in motor vehicle thefts for the purpose of auto parts resale.

CRIME INDEX FOR POPULATION GROUPS—1986

The presentation of crime statistics by population groups was made for the purpose of projecting, for consideration, the relative crime experience of communities of varying populations. Although the individual municipalities within the various groups may be geographically separated, their inclusion into a specific group was predicted by the similarity in population with the other municipalities within the group. Municipalities within the same group may differ widely when all factors are considered, but they do share the common bond of population size. The grouping of communities in this manner allows recognition of variances in the crime volumes, rates and clearances between the established groups.

Set forth below are the established municipal groupings as used in this section:

SECTION VI

CRIME IN THE CITIES

CRIME IN THE CITIES

This section deals with serious crimes reported in the large urban cities of the state. These cities represent 21 percent of the population and historically account for one third of the reported Crime Index of the state.

This analysis involves the latest ten year period 1977-1986 and endeavors to further identify crime trends in these urban areas.

The cities included in this analysis have been categorized as urban municipalities (i.e., densely populated with extensive development) by the New Jersey Department of Community Affairs, Division of State and Regional Planning, Bureau of Statewide Planning.

The criteria used in the selection of these cities were (1) to be classified as urban character and (2) have a population of 50,000 or more inhabitants.

For further comparative analysis, the urban cities were subdivided into two distinct groupings.

Group number one consisted of the state's six largest urban centers with populations of 80,000 or over and is categorized as the "Major Urban."

The second group included the "Major Urban" and the additional urban communities with populations of 50,000 or more inhabitants, and is referred to as the "Urban 15."

Distribution

- Six major urban centers—Camden, Newark, Jersey City, Trenton, Paterson and Elizabeth—collectively represent 13 percent of New Jersey's total population. These same urban centers, during the period 1977 through 1986 accounted for 24 percent of the state's total crime.
- The six centers from 1977 through 1986 accounted for 49 percent of all violent crime and 21 percent of the nonviolent crimes in the entire state.
- The 15 urban municipalities represent 21 percent of the state's total population.
- For the period 1977 through 1986 these 15 urban municipalities accounted for 33 percent of New Jersey's total Index, 60 percent of all violent crime, and 30 percent of the state's nonviolent crime.
- Nearly 7 out of every 10 robberies reported occurred in the "Urban 15" cities during this ten year period.

Percent Change

- During the ten year period 1977-1986, the Crime Index in New Jersey has increased 7 percent, while the "Urban 15" cities increased 24 percent and the six major urban cities increased 18 percent.
- Violent crime in the state increased 51 percent, the 15 urban cities increased 63 percent and the six major cities increased 52 percent.
- Nonviolent crime in the state increased 3 percent, the "Urban 15" increased 18 percent, and the six major cities increased 11 percent.

STREET CRIME

There has never been a clear-cut definition for street crime within the criminal justice system. The nation's clearing house for the collection and dissemination of criminal statistics, the Federal Bureau of Investigation, has no criteria in the categorization of specific crimes to be designated or defined as "street crimes." More and more this media term has been confused with the violent crime group of murder, rape, robbery, and aggravated assault.

Although any particular crime can and does occur on the street, this analysis, because of reporting constraints within the Uniform Crime Reporting System, is limited to defining street crimes as those offenses which occur, or are most likely to occur, on streets, highways, parking lots, etc. These crimes include highway robbery, purse-snatching, theft from autos, theft of auto parts and accessories, theft of bicycles, and motor vehicle thefts. All are crimes against property and only one, highway robbery, falls in the violent crime group.

- During the ten year period 1977-1986, the "Urban 15" cities accounted for 37 percent of the street crimes in the state.
- Three out of every 4 highway robberies occurred in the "Urban 15" during the ten year period.
- More than half of all motor vehicle thefts during the survey span occurred in these 15 urban municipalities.
- Fifty-three percent of all purse-snatchings were perpetrated in the "Urban 15" cities.

The accompanying table reflects percent distribution of street crime for the "Urban 15" cities for the years 1977-1986.

POLICE EMPLOYEE DATA

The Uniform Crime Reporting Program of New Jersey incorporates the collection of pertinent data relating to the police of the state. Information regarding police employee strength, and trends are discussed in this section.

Individual listings of full-time state, county, university and college police departments are shown in tables within this section. Listings of municipal police departments will be found in Section VII.

The determination of police strength for any given area or municipality should be subject for serious consideration. Such consideration, however, should be based on the numerous factors which create the need for police services. For example, the increased need for police service in a municipality which has a highly mobile or seasonal population, differs from a municipality which has a relatively stable population. Some other factors, discussed elsewhere in this publication, relate to size, density of population, geographic location, character, and proximity to metropolitan areas. The tables and charts shown in this section should not be interpreted as recommended strength for any given municipality.

TOTAL POLICE EMPLOYEES

Total police employees are defined as the total number of full-time police officers and civilian police employees (clerks, dispatchers, mechanics, etc.) employed by all law enforcement agencies in the state.

- During 1986, there were 39,690 full time police employees in New Jersey. This represents a 2 percent increase compared to the 38,739 full time police employees in 1985.
- The number of full time police officers increased 2 percent, from 28,958 in 1985 to 29,593 in 1986.
- The number of full time civilian employees increased 3 percent, from 9,781 in 1985 to 10,097 in 1986.
- Seventy-five percent were sworn officers and the remaining 25 percent were civilian employees.

MUNICIPAL POLICE EMPLOYEES

This category consists of the number of police employees, including civilian personnel, employed full time by municipalities of the state.

- During 1986, there were 20,717 municipal police employees, an increase of 1 percent compared to the 20,443 in 1985.
- There were 2.7 municipal police employees for every 1,000 inhabitants of the state; no change since 1976.
- Middlesex County reported the largest increase in municipal police employees, an increase of 4 percent (60 employees).
- Atlantic County recorded the highest police employee rate; 4.8 per 1,000 population; (this rate is computed on the static population and does not take into account the large influx of seasonal and recreational population.)
- Hunterdon County recorded the lowest police employee rate of 1.4 per 1,000 population.

OTHER POLICE (State Agencies)

In addition to the State Police, there were nine other state agencies reporting to the System. These agencies consist of: Bureau of Forest Service, State Parks Security Services, Department of Corrections, Department of Human Services, Division of Criminal Justice, Division of Fish and Game, Office of Weights and Measures, Palisades Interstate Park and N.J. Transit Police. No rates were computed due to the variations in the types of police service rendered, and their statewide jurisdictions.

- Together, these agencies reported a total of 8,302 full-time police employees; a 3 percent increase compared to the 8,084 police employees in 1985.
- There were 4,256 sworn police officers in 1986, an increase of 3 percent compared to the 4,120 in 1985.
- These agencies reported 4,046 civilian police employees in 1986, representing a 2 percent increase compared to the 3,964 reported in 1985.
- Fifty-one percent were sworn personnel, while the remaining 49 percent were civilians.

MUNICIPAL CIVILIAN POLICE EMPLOYEES

The personnel of each department differ as to the demands and responsibilities placed before them. Many police officers are fully occupied with clerical tasks and are not free to perform active police duties. Employing civilians in police departments to perform clerical duties is in line with the thinking of many police administrators who recommended the use of civilians in this capacity, thus freeing the sworn personnel for actual police related services.

- There were 2,893 municipal civilian police employees in 1986, an increase of 1 percent compared to the 2,865 in 1985.
- Fourteen percent of all municipal police employees were civilian.

MUNICIPAL POLICE OFFICERS

This includes the number of sworn police officers employed full-time by municipalities of the state. The police employee rate per 1,000 population presented here should not be construed as being recommended ratios. The determination of police strength for any municipality should be based on the numerous factors which create the need for police services. These factors, as crime, vary in type and degree from place to place. Some examples are: seasonal population, geographic location, density and composition of the population.

- There were 17,824 full-time municipal police officers in 1986; this represents a 1 percent increase compared to the 17,578 full-time municipal police officers in 1985.
- The number of full-time municipal police officers was calculated at 2.4 per 1,000 population; this represents a 4 percent increase compared to 1985.
- Eighty-six percent of all municipal police employees were sworn officers.
- The largest numerical increase occurred in Middlesex County; an increase of 42 municipal police officers, or 3 percent.
- The largest numerical decrease occurred in Essex County; a decrease of 26 municipal police officers, or 1 percent.
- Atlantic County, with 3.8 police officers per 1,000 inhabitants, recorded the highest rate of full-time municipal police officers. (This rate is computed on the static population, and does not take into account the large influx of seasonal and recreational population.)
- Sussex County recorded the lowest rate of full-time municipal police officers with 1.2 police officers per 1,000 inhabitants.

COUNTY POLICE, SHERIFFS, AND PROSECUTORS

The functions of county law enforcement vary widely throughout the state. The operation of one sheriff's department may be limited exclusively to civil areas and the administration of the county jail, or they may be actively involved in criminal matters throughout the county.

County police departments are varied in their activities as well, in that some are responsible for enforcement throughout the county, while others may have as their primary mission the policing of county parklands. The responsibilities of county prosecutors' officers include criminal investigations, trial preparation, court presentation and special probes. Because of the difference in the types of police service rendered, rates for county law enforcement agencies are not presented here.

- County law enforcement agencies reported a total of 6,427 full-time police employees in 1986; an increase of 2 percent compared to the 6,327 in 1985.
- There were 4,710 full-time sworn police officers employed by county agencies in 1986. This represents an increase of 2 percent compared to the 4,640 in 1985.
- The county police agencies reported 1,717 civilian police employees in 1986; a 2 percent increase compared to the 1,687 in 1985.
- Seventy-three percent were sworn personnel while the remaining 27 percent were civilians.

STATE POLICE

The State Police total includes personnel from the Marine Police, Alcoholic Beverage Control Enforcement Bureau, and Capital Police. The breakdown for each bureau is depicted on the State Police Personnel chart.

The New Jersey State Police is empowered to provide all phases of law enforcement throughout the state. It also renders, upon request, police services to all the law enforcement agencies in the state. No rates are used due to the variations in the nature and extent of the police services performed by the State Police.

- The New Jersey State Police reported 3,675 full-time police employees; an increase of 11 percent compared to the 3,315 in 1985.
- There were 2,490 State Police officers in 1986 an increase of 8 percent compared to the 2,315 in 1985.
- The State Police reported 1,185 civilian employees in 1986; an increase of 19 percent compared to the 1,000 in 1985.
- Sixty-eight percent of the total State Police employees were sworn personnel, while the remaining 32 percent were civilians.

SECTION IX

LAW ENFORCEMENT OFFICERS KILLED AND ASSAULTED SUMMARY

POLICE OFFICERS KILLED AND ASSAULTED

The killing or assault of a police officer has a deleterious effect on society that reaches far beyond the overt act. Such occurrences constitute an immediate threat to the well-being of the community and serious breach of the internal security of the country. Today a young man who considers a career in law enforcement must also consider the very strong possibility of being killed or assaulted by a member of the very same society he is sworn to protect. This deplorable situation should be a subject of serious public concern, for in truth, an attack on a police officer is an attack on society. The violence directed against law enforcement officers acting in the line of duty is clearly demonstrated by the following information.

POLICE FELONIOUSLY KILLED

VOLUME/TREND

- In 1986, one New Jersey police officer was feloniously killed while in the performance of his duty.
- On November 6, 1986, while on routine patrol, a uniformed Jersey City patrol sergeant was dispatched to investigate a suspicious person complaint. Upon the officer's arrival the suspect was observed holding a large club. The subject immediately positioned himself adjacent the driver's door of the patrol car and would not allow the officer to exit. Eventually the officer managed to step from his vehicle, at which time the suspect struck him on the head with the large club, dazing him and seizing his service revolver. While still dazed the officer ran into a nearby store to call for assistance; in the process of calling his department he was shot in the back numerous times by the offender. At this time other officers arrived at the scene and killed the armed suspect while attempting to escape.

ASSAULTS ON POLICE OFFICERS

Police assault statistics are important to the police administrator who attempts to identify the causative factors of this type of criminal activity. Many factors contribute to police assaults, and circumstances vary from place to place, it is therefore extremely difficult to identify specific reasons for these assaults. The following information illustrates the frequency of these events, and any attempt at analysis of these assaults should include consideration of the unique variables present in each jurisdiction. Due to the broad field of services performed by many state and county police agencies, no assault rates are computed for total police officers.

VOLUME/TREND

- There were 4,611 police officers assaulted in 1986, a 5 percent increase compared to the 4,371 in 1985.

ADDITIONAL ANALYSIS

- Twenty-eight percent (1,314) of the officers assaulted, sustained injury.
- Personal weapons, such as hands, fists and feet were used in 89 percent of all police assaults.
- Twenty-nine percent of police assaults occurred when officers responded to disturbance calls.
- Thirty-one percent of the assaults on police officers occurred during the four hour period of 8:00 p.m. to 12:00 midnight.

CLEARANCES

- The police of New Jersey were successful in clearing 98 percent of the assaults directed at them.

ASSAULTS ON MUNICIPAL POLICE OFFICERS

VOLUME/RATE/TREND

- There were 4,018 municipal police officers assaulted during 1986, a 7 percent increase compared to the 3,751 assaulted in 1985.
- The assault rate, for every 100 municipal officers, was 22.5; a 4 percent increase compared to 1985.

ADDITIONAL ANALYSIS

- Twenty-seven percent of the municipal officers assaulted, sustained injury.
- Personal weapons, such as hands, fists and feet were used in 88 percent of all municipal police assaults.
- Thirty-three percent of municipal police assaults occurred when officers responded to disturbance calls.
- Attempting Other Arrests accounted for 21 percent of municipal police assaults.

OTHER POLICE OFFICERS ASSAULTED

The following law enforcement agencies are dealt with separately and, are not included when computing municipal assault rates; the services performed by these agencies vary greatly from the functions of municipal police agencies.

VOLUME

- County law enforcement agencies reported 266 officers assaulted, with 121 sustaining physical injury.
- The New Jersey State Police reported 107 officers assaulted, with 21 sustaining injury.
- Other state agencies, with police powers, reported 191 officers assaulted and 77 sustaining injury.
- University and college police agencies reported 29 officers assaulted with 16 sustaining injury.

SECTION X

DOMESTIC VIOLENCE

INTRODUCTION

The violence within the American domicile has been recognized for decades by elements of government and society with little done to correct the problem. Only recently has this phenomenon begun to receive the attention it deserves. In an effort to understand, identify and treat the incidents of abuse occurring within the home, the State of New Jersey, through its legislature, has provided the means to gain a meaningful insight into the issue.

In 1982, the Domestic Violence Act was instituted to protect battered victims and study the complex problems that spark such aggressive behavior. This legislation also provided the opportunity to identify the causes of violence in the home and put forth a more comprehensive effort to combat the crime of Domestic Violence.

Improvements since the implementation of the Domestic Violence Act are continuing; serious concern has been displayed within many municipal and county agencies whereby various committees and working groups have been formed to help battle this important problem. Revised investigation and reporting procedures by the police; improved processing of domestic complaints by the courts; mandatory in-service training for police and court personnel have all enabled the victim to come forward and implement the constitutional rights granted to all Americans.

The following pages of narrative and graphics in this chapter are the result of gathered data displaying the complexities of domestic violence found within the State of New Jersey. As stated in the following pages, reported domestic violence acts increased six percent over 1985. It is through analysis of this data that hopefully, the keys to preventing future violence can be found.

DOMESTIC VIOLENCE STATISTICAL SUMMARY

Highlights of the 1986 domestic violence statistics are listed below:

- There were 43,548 domestic violence offenses reported by the police in 1986, a 6% increase compared to the 41,076 reported in 1985.
- Assaults occurred in 65% (28,220) of the reported offenses in 1986.
- The total arrests (9,860) for 1986 increased 18% over 1985.
- Arrests were made in 23% of the offenses reported for 1986.
- The most frequent day of domestic violence occurrences was Sunday (8,132).
- For the fourth consecutive year, the most frequent hours of domestic violence incidents were between 8:00 p.m. and midnight, when 31% of the offenses were reported.
- Children were involved or present during 55% of all domestic violence offenses occurring in 1986. Specifically, 12% were involved and 43% were present.
- Wives were the victims in 44% (18,955), and female friends were the victims in 33% (14,214) of the reported domestic violence offenses in 1986. Overall, females were victims in 85% (37,183) of all domestic violence offenses; the same percentage as in 1984 and 1985.
- The number of domestic violence complaints that had prior court orders issued against the offender increased from 6,079 in 1985 to 7,134 in 1986. This is a 17% increase.
- Alcohol and drugs were involved in 44% (19,206) of the reported offenses occuring in 1986. Alcohol involvement alone accounted for 39% (16,922) of the total domestic violence offenses reported.
- Persons age 60 or over, were victims in 3% (1,460) of all reported domestic violence offenses that occured in 1986.

CALCULATIONS OF RATES AND TRENDS

1. **Crime Rate per 1,000 Inhabitants**—This represents the number of Index offenses per 1,000 inhabitants.
   For example: What is the crime rate for a municipality with 513 Index offenses (murder, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft), with a population of 8,280?
   513 (Index offenses) ÷ 8,280 (population) = .061957 x 1,000 = 62.0 (crime rate per 1,000 inhabitants)

2. **Crime Trend**—A crime trend shows the extent to which crime increased or decreased. This is done by comparing a period of the current year with the same period of a previous year.
   For example: A municipality experienced 264 Index offenses in 1980 and 513 Index offenses in 1981. What is the percent of increase?

   513 (1981 Index offenses)—264 (1980 Index offenses) = 249 (numerical increase)

   249 (numerical increase) ÷ 264 (previous year) = .943 x 100 = +94% (percent increase)

   Note: If there were more Index offenses in 1980 than in 1981, we would have a percentage decrease.

3. **Number of Police Personnel Per 1,000 Inhabitants**—This is calculated in the same manner as crime rate.
   For example: A municipality with a population of 8,280 and 28 police personnel. How many police officers are there per 1,000 population?
   28 (police personnel) ÷ 8,280 (population) = .00338 x 1,000 = 3.4 (police personnel per 1,000 inhabitants)

   Note: This formula can be applied to either total police personnel or just police officers per 1,000 inhabitants.

4. **Police Assaulted Rate**—This is calculated at a rate per 100 police officers.
   For example: A municipality with 25 officers had 5 of them assaulted during the month. What is the police assaulted rate?
   5 (police officers assaulted) ÷ 25 (police officers) = .2 x 100 = 20 (police assaulted per 100 police officers).

5. **Clearance Rate**—This refers to the percent of Index offenses cleared (solved), over a specified period of time.
   For example: A municipality with 513 Index offenses in 1981, cleared 95 of these offenses. What is the clearance rate?
   95 (Index offenses cleared) ÷ 513 (Index offenses) x 100 = 18.5 (percent cleared).
